PROJECTS

HR Attendance Management System (Laravel and Flutter) | GP Project

2020 – 2021

This app is a free attendance management system helps you to manage your employees and staff attendance with the help of a simple QR code scanner by allowing the employee to check-in and check-out using QR Code from their mobile phone only and detect their Locations with GPS (location services).

The system will consist of two main components as following:

Mobile App: to be used for staff (employees) to record their attendance and absence and follow up on the date of attendance and absence in the form of reports and request permission for vacations or early departure.

Dashboard (Web App): HR system to manage all functionalities (employees and attendances, leaves, shifts, tasks, holidays, QR Code generation, etc.).
